Peryer Construction Ltd
Registered Master Builders
P O Box 47 117
Trentham
UPPER HUTT

Dear Bill

I am writing to acknowledge formally the splendid work you have been doing at Wellington East Girls' College since you began here building our Sports Centre in 2002 and the many other tasks you have completed, both minor and major, to the same high standard.

The Management at Peryer Construction Ltd communicated effectively and in a timely fashion with our Board of Trustees and with me so we knew what was to happen in advance and could monitor progress on the Sports Centre project. On smaller, indeed often very small subsequent projects, the Management quoted for us, provided builders and delivered these projects on time and without upsetting the teaching and learning in the college.

On the Sports Centre job the foreman was Peter Wickens. He managed the project superbly with all sub trades turning up at the appropriate times. He checked the work was done to the standard required by the architect and enhanced the design with well thought out touches. He was always happy to discuss building issues and explain the architect's drawings.

The site meetings were informative and the written reports covered all the important matters such as Health and Safety issues – never a problem and they could have been, working as Peryer's was, within a girls college. At nearly all site meetings, Peter could report that the work was on or ahead of schedule and he commanded the respect of the other professionals present.

At all times the Foreman communicated with the Property Manager at Wellington East Girls' College and with me on any likely problems which we were able to circumvent. We could thus schedule the most dangerous activities during the school holidays.

Peryer's Construction Ltd Office constantly supported the project and provided us with detailed and helpful invoices. The Sports Centre building programme had to be modified when foundation problems were discovered but these were solved and the project came in on time within budget. The building is still admired and the finish has stood up to heavy use over the last 3 years.
